"PMRExpo 2019: A global top event"

Almost 4,600 visitors and more than 230 exhibitors from all over the world

The PMRExpo 2019 has been a global top event with worldwide significance and reach: More than 230 national and international exhibitors from 22 countries of all continents presented themselves in Cologne from 26 to 28 November 2019 on an exhibition area of 4,900 square meters. PMRExpo 2019 products and presentations were characterized by a wide range of technology variants, technical development and innovation. The strong internationalization of the PMRExpo found expression in the new record of almost 4,600 visitors from security organizations, the energy sector, passenger transport systems, logistics, industrial enterprises, specialist trade shops and other industries.

Bundesverband Professioneller Mobilfunk (PMeV): PMRExpo initiator and promotional supporter

With the words, "We are very pleased, that for almost 20 years the PMeV Association has had the possibility to actively participate as initiator and promotional supporter of the PMRExpo in the successful development of this exhibition", Bernhard Klinger, President of the German Industry Association PMeV, welcomed the visitors. As a network of experts for secure communication, the PMeV is accompanying the continuous technological change and currently the transfer from narrowband to broadband technologies. "Even if 5G will take its place in the environment of professional communication: The major requirements to mission- and safety-critical communication systems are still being technology-independent", explained Klinger.

Key issues: Broadband, cybercrime and others

On the "Secure Communication" summit, both national and international top speakers presented current developments and trends all around safety-critical communication. An outstanding role played the technological change in the broadband direction. Besides the usual lectures and presentations, interactive topic-tables and discussion groups with more than 30 experts have been offered for the first time. The top issues included not only broadband communication, but also cybercrime, use of drones and the control center from the cloud.

Network of secure communication

The PMRExpo is not only the leading European fair, but also a worldwide network for secure communication. Users, manufacturing companies, system providers and application houses, network operators, consultants and experts establish new contacts in Cologne and meet to exchange expert opinions. In his welcoming speech, Bernhard Klinger, President of the PMeV, emphasized: "Mission- and safety-critical communication is more important than ever before."

About PMeV – NETZWERK SICHERE KOMMUNIKATION

The PMeV is a network of experts for mission- and safety-critical communication solutions in mobile professional applications. Its members include manufacturers, system providers and application houses, network operators, users, consultants as well as further specialists and experts. The aim of PMeV is to further expand and develop the PMR market in Germany. The Association demonstrates the importance of PMR solutions for business and national economies and influences the political and regulatory parameters and framework for the use of professional mobile radio solutions. In its role as leading center of competence for PMR in Germany, PMeV offers a forum for a neutral, manufacturer-independent and collaborative dialog with market partners, politicians as well as public authorities and institutions. In addition, PMeV offers manufacturers, users and consumers a neutral dialog platform for the assessment of technologies and the discussion of chances and risks of technical solutions and concepts. The PMeV Association promotes standards and is actively involved in their further development in line with the requirements of the German market.
