## HMF continues as PMeV Board Chair for another two years

Bad Mnder, 31. March 2023

**HMF Smart Solutions will continue to lead the German Professional Mobile Radio Association (PMeV) - Netzwerk sichere Kommunikation for the next two years: The board members unanimously re-elected Chief Strategy Officer Bernhard Klinger as their chairman at the PMeV general meeting last week in Berlin.**

"I am pleased about the confidence that continues to be placed in me," said Bernhard Klinger after the election. The PMeV members had first re-elected their board at their meeting, which then confirmed its chair. HMF has been continuously involved in the work of the board since the founding of the national association (1999).

Bernhard Klinger has already been leading the PMeV since 2019. Together with the board and the member companies, he wants to further strengthen and expand the networking and positioning of the PMeV.

"Secure and highly available communication is essential for the advancing digitalisation in almost all industries," says Klinger. This offers PMeV member companies the opportunity to expand existing markets and develop new ones. "PMeV will closely accompany the technology change in professional mobile communications in the direction of broadband. In this context, 5G campus networks in Germany will play a decisive role. We at HMF Smart Solutions are also working intensively on this topic."

### Social media

5G campus networks for business-critical communication, for example, will be a focus topic at the next PMRExpo (28-30 November 2023 in Cologne). PMeV is the conceptual supporter of the international trade fair.

### **About HMF Smart Solutions**

HMF Smart Solutions (HMF), based in Bad Münden, Germany, has been developing and implementing customised, mission-critical communication solutions in the field of professional mobile radio for more than 40 years. HMF is an established specialist for technologies such as TETRA and LTE/5G, offering highly available and secure radio communication solutions for industrial, utility and transport companies, the oil and gas industry as well as for security and rescue forces, among others. HMF regards itself as a holistic solution provider whose core expertise is comprehensive project support from a single source – from development and planning to implementation, including services and network operation.
